COMPANY OVERVIEW

Founded in 2015, RCS Construction Services is a minority-owned roofing consulting firm serving residential and commercial property owners throughout the Dallas/Fort Worth metropolitan area. As a HAAG Certified residential roof inspector with OSHA 10 and OSHA 30 certifications, RCS brings independent expertise and integrity to every engagement.

RCS does not sell roofing materials or perform installations. Instead, we serve as your trusted, unbiased advisor — educating owners on proper materials, installation methods, and the insurance claims process before any work begins. We work on your behalf, not the contractor's, to ensure you receive quality work and fair value.

CORE COMPETENCIES

Roof Inspections Detailed assessments identifying damage, wear, and vulnerabilities before they become costly problems.	Storm & Hail Damage Expert identification and documentation of storm and hail damage to support insurance claims and restoration.	Insurance Process Guidance Step-by-step guidance through the insurance claims process to help property owners maximize their coverage.
Roof Leak Detection Precise location of active and latent leaks to stop water intrusion and prevent structural damage.	Roof Repair Consultation Advisory on damaged shingles and structural concerns to ensure the right repair approach is selected.	Roof Replacement Advisory Guidance on selecting high-quality roofing systems that improve longevity and curb appeal.

RESIDENTIAL & COMMERCIAL CAPABILITIES

RESIDENTIAL

- Detailed residential roof inspections (HAAG Certified)
- Shingle, tile, Stone coated steel and slate roof systems
- Storm and hail damage documentation
- Roof repair and replacement consultation
- Roof maintenance planning
- Insurance claims process support

COMMERCIAL

- TPO, Modified Bitumen, PVC, SPF, and BUR systems
- Commercial roof assessments and condition reports
- Roofing system selection and vendor guidance
- Storm damage evaluation and documentation
- Roof coating and life-extension consultation
- Strategic coordination with vetted installation partners

CERTIFICATIONS & CREDENTIALS

HAAG Certified Residential Roof Inspector

A nationally recognized credential from Haag Engineering certifying expertise in assessing weather-related roof damage and producing defensible inspection reports for insurance and claims purposes.

OSHA 10 Certified

Completion of the 10-hour OSHA construction safety training covering hazard recognition, worker rights, and standards for safe jobsite practices.

OSHA 30 Certified

Advanced 30-hour OSHA training for supervisors and safety leaders, covering hazard avoidance, OSHA standards, and responsibilities for managing safe construction worksites.
